ULKA INDUSTRIES PVT. LTD.

Innovators in Sugarcane Milling
Supplier of Complete Sugar Plant on EPC Basis

Successful Installations Of Complete Sugar Plant Machineries On Domestic And International Level

Never Before
High Performance
High Efficiency
Increase in Profitability

Bagasse Moisture
less than 46%
Primary mill extraction
more than 75%
Reduced mill extraction (RME) for tandem
more than 90%

FOR ALL YOUR CANE MILLING & SUGAR PLANT RELATED TURN-KEY SOLUTIONS!!!
(Innovative solutions for cane sugar engineering)

- Up-gradation / Expansion of existing Conventional Tandems Now Easily Possible & more Profitable
- Ulka Mill – A must for any Co-Generation Plant
- Ulka Mill Tandems offering extraordinary efficiency not possible before

Low maintenance cost
No trash plate
No pressure chute
Low Power Consumption

COMPLETE SUGAR & CO-GENERATION PLANTS, COMPLETE DISTILLERIES, INCINERATION BOILERS & POWER PLANTS

+43 Complete Sugar Plants

SUGAR PLANT FEATURES

- Steam consumption (i.e. 30%),
- Design of each plant is customized with view to provide economy, capacity optimization, efficiency, low power and low steam consumption, advanced engineering and layouts.
- Most economical power consumption.
- Simple designs with less maintenance.
- Fastest project execution.

Biogas to Power and Biogas Upgrading Systems

Biogas to Power

Disposal and treatment of biological waste represent a major challenge for the waste industry.

For a wide range of organic substances from agriculture, foodstuff of feed industries, anaerobic digestion is a superior alternative to composting. Biogas – a mixture of both methane and carbon dioxide – is created during anaerobic digestion and serves as a high-energy renewable fuel that can be used as a substitute for fossil fuels. Biogas-fuelled gas engines improve waste management while maximising the use of an economical energy supply.

Biogas Upgrading
(Membrane gas separation technology)

Biogas upgrading is the process of the separation of methane from the carbon dioxide and other gases from biogas.

The concentrated biogas – close to 100% methane is called 'biomethane' or 'renewable natural gas' (RNG). This gas can be used as a vehicle fuel or injected into the gas distribution network. Biogas upgrading can be used in parallel to gas engines where power and heat are required on site.

Why Clarke Energy for biogas projects?

- Local long-established presence and footprint in India
- Local team of field service engineers
- Unparalleled international biogas experience on varying applications and process technologies
- Proven, best-in-class technology
- Quality engineering
- Combination of biogas CHP and biogas upgrading support

Flawless cooling
even after 40 years

Paharpur's products for sugar cogen plants have lasted 40+ years and still deliver reliable cooling

Paharpur has been solving the toughest cooling challenges in sugar cogen plants – ensuring high productivity with reliable thermal performance. Our cooling towers for the sugar industry are resistant to fouling and corrosion, require low downtime, and deliver optimum cooling for decades. This is why we have been the preferred cooling partners to industry leaders like Bajaj Hindustan, Balrampur Chini Mills, Dalmia Bharat, Dhampur Green, Dwarikesh Sugar, EID Parry, Shree Renuka, Triveni Group, Uttam Sugar, amongst others.

CBL Steaming Ahead

POWERING INDUSTRY WITH SUSTAINABLE BIOMASS ENERGY

BIOMASS FIRED RECIPROCATING GRATE BOILERS

Engineered for high efficiency, fuel flexibility and long operational life. CBL boilers convert biomass and industrial waste into reliable, clean energy.

WHY CBL?

- Highly advanced grate technologies:
  - ✓ Water-Cooled Vibrating Grate
  - ✓ Reciprocating Grate
  - ✓ Travelling Grate
- Suitable for low-grade fuels.
- High fuel flexibility with superior combustion efficiency.
- Easy fuel feeding system with options to use loose fuel as well as bale form.
- Innovative grate mechanisms and optimized combustion chamber design.
- Cost-effective solutions with long operational life.

Multiple Fuel Compatibility

Sustainable Power. Proven Performance.
